

ELEVATE STUDY SKILLS

Year 10, 11 and 12 recently had the opportunity to participate in a 2 hour study skills program facilitated by Gus, a presenter from Elevate Education.

Feedback given after each session was overwhelmingly positive. This intensive session was both a welcome and rewarding exercise, providing the girls with some valuable yet practical skills as they prepare for senior studies and exams. Thanks must go to the P and F for their sponsorship of this activity, as it was a worthwhile experience for the girls, hopefully having a long lasting and beneficial outcome.

Mrs Dianne Auhl

“The study skills seminar last Tuesday allowed the students of Year 11 to gain vital skills in preparation for the start of their HSC course next term. The seminar answered the question as to ‘How do I study?’, providing excellent ways of approaching study for different types of students.”

Rani Balak

“The Study Skills Seminar was very informative and motivating, providing a lot of valuable and worthwhile information. The presenter, Gus, was extremely entertaining and thought provoking, which thoroughly engaged the audience. I’m sure all of Year 11 will take this information and help onboard in the coming weeks leading up to exams.”

Molly Hanley

“The study seminar was fun, interesting, enjoyable and very useful. It gave me new ideas on how to study and really highlighted how important it is, and how easily it can be done. I learnt that studying is more than sitting at your desk for an hour, it can simply be revising your notes while eating breakfast. I learnt using colour in your notes, mind maps, practice papers and diagrams are important and help you to memorise what’s important.

The biggest thing I took from the day was that your study timetable isn’t all about making time to study but to make time to have fun and do leisure activities. As Gus quoted “we don’t make a baseball player throw a ball with a broken arm, so why should we sit a mentally draining task without a healthy mind”.
