

INQUISITIVE MINDS

Year 8 experienced Inquisitive Minds on Thursday 27th August. During each session students participated in an interactive lesson on strategic problem solving and worked through a series of original hands-on problems.

The students thoroughly enjoyed the activity and the presenters commented on their high level of engagement and excellent behaviour. Congratulations Year 8 on a wonderful mathematical experience.

"The Inquisitive Minds activity was a very interesting and enjoyable day. Not only did we learn vital maths skills to help with problem solving but it also developed our teamwork abilities. The maths games were so intense because there was lots of chocolate at stake!" Georgia and Ranuli

"I got a lot more out of the day than expected and learnt new skills. We did two competitions as pairs against others and there were prizes to be won. It was fun, even for those who don't enjoy Maths." Leigh and Marla

Inquisitive Minds Winners

L to R: Chelsea Seaman, Ella Welsh, Tyra Jarvis, Emily Newman, Jennifer Whitwell, Isabel Smith.

L to R: Graison Barratt, Niamh Sinclair, Cassandra Cleathero
