

## MATHEMATICS CHALLENGE

Every year the Mathematics Department invites a number of students to participate in the Mathematics Challenge for Young Australians, which is a national Mathematics competition run by the Australian Mathematics Trust. The Mathematics Challenge gives students an opportunity to solve interesting mathematical problems, whilst developing a greater interest in, and awareness of the power of Mathematics.

This year three girls achieved a Distinction for the Mathematics Challenge. Congratulations to Ranuli Dissanayake, Radhika Singh and Moumita Paul. The following students successfully completed the Mathematics Challenge and received a certificate of participation, Graison Barratt, Ann-Marina Benzy and Lillian Collins. All girls worked hard to complete the challenge and are to be commended on their efforts.
