

POWER OF ENGINEERING

Students from Years 9 and 10 recently visited Charles Sturt University. CSU have developed a 5 and a 1/2 year Master Degree Course for Engineering. It is unique in that it is Industry based, with four 1 year placements with industry partners in regional areas. The students thoroughly enjoyed their visit. The focus is Engineering as a teams package, not just for Maths and Physics. Communication skills are equally developed.

Student Quotes - Women in Engineering at CSU

Wow! The facility was AMAZING but the food was better!

It was a great day overall. I didn't know what to expect walking in but throughout the day the knowledge I received definitely changed my perspective on the way I looked at engineering and I now consider it as a possible career option.

The power of engineering day was brilliantly put together and combined learning with imaginative, fun activities. The different stations we visited detailed the different branches of engineering that, until that day, I didn't know existed. Summary of the day: Eye-opening!

Before, I didn't know what jobs engineers do. I learnt a lot from the activities.

It really widened my idea of engineering and it truly surprised me about the diverse range within
