

## AGRICULTURE REPORT

In May the Year 12 Agriculture Class spent three days in Wagga Wagga to commence their Beef Product Study. It was an excursion which fortunately bestowed beautiful weather and wonderful company. The three days were full of new experiences for the girls, and although sometimes a little confronting, hopefully worthwhile. During the excursion the group visited a beef feedlot which holds up to 17,000 animals, spent a morning with the owner of "Scott's Angus" a stud bull farm, an afternoon at Tey's beef processing facility, a tour of a gourmet butcher shop 'Knights Meats,' and the opportunity to have a lecturer show the students through some of the Vet and Animal Science facilities at Charles Sturt University.

The Agriculture girls also enjoyed an appetising visit to the Junee Licorice and Chocolate Factory, as well as a dinner at Hogs Breath Café, where some of the students accomplished the full paddock to plate experience by indulging in some beef.
